IMPORTANT SAFETY NOTICE REGARDING WIPERS

Wipers shown on the Lynbond 2000 web site are intended for use as dry wipers, or in combination with certain solvents such as H₂O, or IPA/H₂O mixtures, or with other solvents that the user has determined are safe to use.

The wipers supplied by Lynbond 2000 should not be used to wipe up spillages of highly oxidizing chemicals, as this represents a significant FIRE HAZZARD. Chemical spillages should be dealt with by following procedures that are in line with UK HSE advise and UK legal requirements. The links below may be helpful in this regard.
